A. drive in Gary over the weekend and Decoration day yesterday, the various committees took up their canvass of the city yesterday with renewed efforts and by the middle of the week hope to be able to report a total in subscriptions of some \$75,000.

What's become of the prejudice against automobiles because they frightened the horses

NOW cars are everywhere. The horses have gotten used to them—and so has everybody else. Think of it! This year the American people will spend *nearly a billion dollars* on tires alone.

Tires are one of the *biggest items* on the car owner's bills.

Hardly a Saturday, when you motorists drop in to "tune up" for a Sunday trip, that one or more of you doesn't tell us something of value to our business. Sooner or later it comes back to you in *Service*.

Service is what the car owners of this community are looking for nowadays.

And especially the *small car owners*, who put service

first in figuring their motor-ing expenditures.

Just because a man has a moderate-price car is no reason why he should get any *less service* out of his tires.

We believe that the man with the small car is entitled to *just as good tire service* as the man with the big car—and both are entitled to the *best tire service* they can get.

That's why we represent U. S. Tires in this community.

And why more car owners—*large and small*—are coming to us every day for U. S. Tires.

Come in and talk to us about tires. We're here to help you get the kind of tires you want.
